Access path key*

- Accessible Route—This path generally conforms to accessibility standards.
- Areas that may be a travel hazard [where the slope exceeds the standard maximum ramp slope (8.3%), or the cross-slope is significant (exceeds 4%)].
- ⋯ Ramp (5%–8.3%)—Complying ramp along the accessible route.
- - - Partially Accessible Route—This path generally conforms to accessibility standards, but there may be excessive cross-slope (over 2%) or other irregularities in a portion of the path, often along the path edge. There is usually a 48" wide complying path along these routes, though it may not be a straight or direct line.
- ⋯ Lighter shade indicates path continues underneath overhang.

*Note: The map and information on pathways are limited by the scale. The accessible route should be clear to a person at a location, while the dashed line is intended to indicate where keener observation may be necessary to locate the accessible route. Pathways are generally asphalt and subject to weathering, erosion, up-lifting, and other changes that may create navigational issues. SFSU is committed to maintaining the accessible route. Please report any irregularities to Disability Programs and Resource Center, 415-338-2472 (voice, TTY).
